Certification process consists of initial and regular assessment of:

- quality system
- product/service

Alarm Transmission System (ATS)

Technical specification scope

For the delivery of the service alarm communication within an alarm transmission system, the following resources are needed:

- a. An approved and certified Supervised Premises Transceiver according to EN50136-2;
- b. An approved and certified Receiving Centre Transceiver according to EN50136-3 that is compatible with the Supervised Premises Transceiver;
- c. A network between the Supervised Premises Transceiver and Receiving Centre Transceiver as part of EN50136-1;
- d. A management organization that determines the performance the alarm transmission system and provides the periodic reporting provides EN50136-1 and, if necessary, directly communicates with the user;
- e. A management organization which takes proactive corrective actions if the performance of the alarm transmission system is insufficient.

Specific scope according to the certification scheme

Scope number 3. The supplier that delivers the equipment, network and tools for the end-to-end alarm transmission system and is responsible for the end-to-end performance and is responsible for compliance with the performance requirements and reporting based on proactive actions and provides the services "alarm communication system".

Application and use

The alarm transmission systems are to be used in conjunction with detection installations for fire according to EN54-1 and for intrusion according to EN50131-7 to ensure the life safety and / or security levels laid down in the basic design of these installations.

Marking

RECOMMENDATIONS FOR CUSTOMERS

Check at the time of delivery whether:

- the supplier has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport etc.

If you should reject a product on the basis of the above, please contact:

- ASB Security
- and, if necessary,
- Kiwa Nederland B.V.

Consult the supplier's processing guidelines for the proper methods.
